ABOUT US

Kihan Sanat Pars Adak is a leading Iranian **Barite** manufacturer, miner and exporter specialized in high quality Barite for oil & gas drilling applications.

With our own barite mine, advanced processing plant and experienced team, we deliver premium products that meet API 13A standards and the expectations of our global customers.

Our mission is to provide reliable supply, consistent quality and professional service to the oil & gas industry worldwide.

INTEGRATED OPERATIONS FROM MINE TO MARKET

From extraction to processing, quality control, and export, we manage the entire supply chain to ensure superior quality, competitive prices and on-time delivery.

MINING

PROCESSING

QUALITY

EXPORT

OUR KEY STRENGTHS

OWN BARITE MINE

High grade barite reserve with stable raw material supply.

PROCESSING PLANT

Advanced equipment and technology for best quality products.

QUALITY CONTROL

In-house laboratory ensuring products meet API 13A standards.

EXPORT PACKAGING

Bulk (1 MT Jumbo Bag) and 25 kg bags available as per customer request.

GLOBAL EXPORT

Exporting to Middle East, Asia and other international markets.

CUSTOMER FOCUS

Reliable quality, competitive prices and professional service.

MINING OPERATIONS

QUALITY STARTS AT THE SOURCE

Our barite mine is located in one of the richest barite regions in Iran. With high reserves and advanced mining equipment, we ensure a stable supply of high-grade barite for various industrial and drilling applications.

OUR MINE

- ✓ High-purity barite with excellent specific gravity
- ✓ Consistent quality and low impurity content
- ✓ Large proven reserves
- ✓ Continuous production capacity
- ✓ Environmentally responsible mining practices

MINING PROCESS

- 01 Drilling & Blasting**
Controlled blasting to ensure optimal fragmentation.
- 02 Loading**
Loading the run-of-mine (ROM) using excavators.
- 03 Hauling**
Transporting to primary crushing by heavy-duty trucks.
- 04 Stockpiling**
Raw material is stockpiled for processing.

PROCESSING PLANT

ADVANCED TECHNOLOGY, CONSISTENT QUALITY

Our processing plant is equipped with modern machinery and a complete production line to ensure the highest quality barite products for the oil & gas drilling industry.

From raw material to final product, every step is performed under strict quality control procedures to meet API 13A specifications.

1. CRUSHING

Raw barite is crushed to reduce size.

2. GRINDING

Fine grinding in ball mills to achieve desired fineness.

3. CLASSIFICATION

Material is classified by advanced air classifiers.

4. PACKAGING

Products are packed in jumbo bags or 25 kg bags.

5. STORAGE

Finished products are stored in a clean and dry warehouse.

PLANT FEATURES

- High capacity production line
- Advanced crushing & grinding systems
- Air classification for precise sizing
- Dust collection & environmental control
- Automated packaging systems
- Trained and experienced staff
- Strict quality control at every stage

QUALITY CONTROL

COMMITTED TO EXCELLENCE, DELIVERING TRUST

Quality is our priority. Our in-house laboratory is equipped with advanced testing equipment and operated by experienced professionals to ensure our barite products meet and exceed API 13A standards.

From raw material to final product, every batch undergoes strict quality control to guarantee consistency, reliability and performance in the most demanding drilling conditions.

OUR QUALITY ASSURANCE

INTERNATIONAL STANDARDS

Our products comply with API 13A specifications.

ADVANCED LABORATORY

Modern equipment for accurate and reliable analysis.

STRICT INSPECTION

Every stage is monitored to ensure consistency and quality.

TRACEABILITY

Complete batch traceability from mine to customer.

EXPERIENCED TEAM

Skilled chemists and technicians with industry expertise.

ADVANCED LABORATORY EQUIPMENT

Muffle Furnace
For loss on ignition test (LOI)

Analytical Balance
High precision weighing for accurate results

Mud Balance
For specific gravity measurement

Sieve Shaker
For particle size distribution analysis

XRF Spectrometer
For chemical composition analysis

API BARITE for Oil & Gas Drilling

HIGH PERFORMANCE. PROVEN RESULTS.

Our API Barite is specifically processed to meet the stringent requirements of API 13A Specification for Drilling Fluids Materials. With high specific gravity, excellent chemical stability and low impurity content, our barite ensures maximum performance and safety in all drilling conditions.

API 13A SPECIFICATION COMPLIANT

TYPICAL PROPERTIES

Property	Unit	Typical Value
Specific Gravity	g/cm ³	4.20 – 4.35
BaSO ₄ Content	%	≥ 90
Moisture Content	%	≤ 0.3
Soluble Salts (as NaCl)	%	≤ 0.2
Acid Insoluble	%	≤ 0.2
pH (10% Solution)	-	6.5 – 9.0
Oil Absorption	g/100g	15 – 20
Particle Size (D50)	µm	8 – 20
Appearance	-	White to Off-White Powder

* Typical values – not to be considered as a specification

HIGH DENSITY

Provides high mud weight for well control

CHEMICAL STABILITY

Inert and non-reactive in drilling environments

LOW IMPURITIES

Ensures clean drilling fluid and minimal equipment wear

APPLICATIONS

Oil & Gas Drilling

Used as a weighting agent in drilling fluids to control formation pressure and prevent blowouts.

Directional & Horizontal Drilling

Maintains wellbore stability and enhances drilling performance.

HPHT Wells

Performs reliably under high pressure and high temperature conditions.

Onshore & Offshore Operations

Suitable for all types of drilling operations worldwide.

KEY BENEFITS

Well Control

Helps maintain formation stability and prevent kick.

Optimum Performance

Consistent quality ensures efficient drilling operations.

Equipment Protection

Reduces wear and tear on drilling equipment.

Environmentally Safe

Naturally occurring mineral, non-toxic and eco-friendly.

Reliable Supply

Continuous production and on-time delivery for your projects.

**CONSISTENT QUALITY.
GLOBAL TRUST.**

Kihan Sanat Pars Adak is your reliable partner for premium API Barite, delivered with consistency, integrity and commitment.

PACKAGING & LOADING

SAFE PACKAGING. SECURE DELIVERY.

Our barite products are packed using high-quality materials to ensure maximum protection, ease of handling and safe transportation to global destinations.

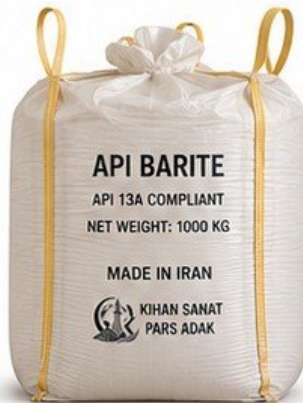

We offer flexible packaging options to meet different customer requirements.

PACKAGING OPTIONS

01 JUMBO BAG (FIBC)

- ✓ Capacity: 1000 kg ($\pm 1\%$)
- ✓ Material: 4-Loop FIBC Bag
- ✓ Safety Factor: 5:1
- ✓ Top: Filling Spout
- ✓ Bottom: Discharge Spout
- ✓ Liner: PE Liner (Optional)
- ✓ Printing: As per customer request

02 25 KG BAGS (WOVEN / PAPER)

- ✓ Capacity: 25 kg ($\pm 1\%$)
- ✓ Material: Woven / Paper Bag
- ✓ Lining: PE Liner (Optional)
- ✓ Printing: As per customer request
- ✓ Palletizing: 50 bags per pallet (1250 kg)
- ✓ Shrink Wrap: For extra stability

OUR KEY FACILITIES

01

PROCESSING PLANT

Advanced crushing, grinding and classification systems for consistent quality and high production efficiency.

02

LABORATORY

Fully equipped laboratory for chemical, physical and particle size analysis to ensure product compliance.

03

WAREHOUSE

Spacious and covered warehouses to store bulk and bagged products under proper conditions.

04

OUTDOOR STORAGE

Designated outdoor storage areas with easy access for loading and efficient inventory management.

05

LOADING AREA

Large loading area with modern equipment for fast and safe loading operations.

06

WEIGHBRIDGE

Digital weighbridge system for accurate weight control and smooth logistics operations.

SUSTAINABILITY & ENVIRONMENT

We are committed to protecting the environment and using resources responsibly in all our operations.

RESPONSIBLE SOURCING

Raw materials are sourced responsibly to reduce environmental impact.

DUST CONTROL

Advanced dust collection systems to maintain clean air and safe workplace.

WASTE MANAGEMENT

Efficient waste management and recycling practices in all processes.

ENERGY EFFICIENCY

We optimize energy consumption to minimize our carbon footprint.

ECO-FRIENDLY OPERATIONS

Committed to sustainable practices for a better future.

Our goal is to create long-term value for our customers, employees and the environment through sustainable growth and innovation.

HEALTH, SAFETY & ENVIRONMENT (HSE)

Safety is our top priority in every operation.

We follow strict HSE policies and international standards.

Continuous training and awareness for all employees.

Regular inspections and risk assessments.

Zero compromise on people, safety and the environment.

**“SAFETY TODAY,
SUCCESS TOMORROW.”**

MESSAGE FROM THE CEO

READY TO SERVE. READY TO GROW.

Dear Valued Partners,

On behalf of Kihan Sanat Pars Adak, I would like to thank you for your trust and interest in our company and products.

With over a decade of experience in barite mining, processing and export, our mission has always been clear: to deliver premium quality products, ensure consistent supply, and build long-term partnerships based on trust and reliability.

We operate our own mine, advanced processing plant and in-house laboratory to guarantee full quality control over every stage — from the heart of the mine to the oilfield.

Our API drilling grade barite is produced to the highest international standards and is trusted by clients across the Middle East, Asia and beyond.

As global energy demands grow, we remain committed to supporting the oil & gas industry with materials that meet the most stringent requirements.

We are READY to supply.
We are READY to partner.

We welcome new opportunities and look forward to cooperating with your esteemed organization for mutual growth and success.
